

Job Announcement

Senior Research Associate Vaccine Extraction and Immunology

Sanaria Inc. is a Rockville, Maryland based biotechnology company that is dedicated to the production of an attenuated sporozoite malaria vaccine. We currently have an opening for a Senior Research Associate in the Vaccine Extraction and Immunology Group.

The senior RA will actively participate in tasks and activities in support of Sanaria's conduct and management of small animal research. This position primarily involves investigation and characterization of the sporozoite stage of various species of the malaria parasite in appropriate experimental models. The incumbent will also gain experience in vaccine extraction related activities in full compliance with cGMPs.

Qualified candidates must have a Master's Degree in Biology or a related discipline, with 3-5 years of experience with small animal research. Excellent communication, writing, team work and organization skills and the willingness to learn new experimental techniques in a highly collaborative environment are required. Hands-on experience working with small animals is required, and experience in the field of Malaria is desirable. Proficiency in "Microsoft excel" and "Microsoft word" and writing up technical reports, summaries, protocols and perform quantitative analyses, is a must. The ability to work in a fast-paced, collaborative team environment with multiple and competing priorities is essential, together with a strong demonstration of individual initiative.

We offer a competitive salary and benefits package. Long term eligibility to work in the US without visa sponsorship is required for this position. Please send cover letter, resume and salary history indicating Scientist Vaccine Extraction in the subject line to: careers@sanaria.com.

Sanaria Inc. is an equal opportunity employer.
